

Inflatable Air Splints

Essential for any first aid supply, Inflatable Air Splints provide immediate immobilization of injured limbs.

Orally-inflated via a screw air valve, the splint could also be used as a self contained tourniquet to stem the flow of blood and promote infection control.

- Transparent plastic and nylon zipper is fully x-ray translucent, and the vinyl construction allows x-rays as well as constant observation of the injury
- Available singly and in kits in a variety of sizes for adults and children

SPECIFICATIONS

Splint: Frosty vinyl, PVC

Zipper: Nylon with metal pull

Push/Pull Valve: Vinyl PVC
