

## *L554 Reusable Manual Resuscitator*

***L554 Reusable Manual Resuscitators*** are autoclavable rear-fill manual resuscitation systems that are available in adult, child and infant sizes. The L554 features a silicone bag that provides an excellent “feel” of the patient’s respiratory response, and the durable polysulfone patient valve and connectors provide long life at autoclave temperatures of 270°F (132°C).

When connected to a metered low flow oxygen source, the L554 resuscitator can deliver FiO<sub>2</sub> concentrations between 73% and 97%. Used in conjunction with an L471 bag refill valve, it ensures 100% oxygen is delivered during resuscitation.

Child and infant bags are available with an optional pressure relief valve, which activates at 45 cm H<sub>2</sub>O and can be over-ridden by the operator

The L554 resuscitator can be ordered in individual sizes or in kits that come with combinations of adult, child and infant bags and masks.

<b>ACCESSORIES</b>				
LPEEP	Disposable PEEP Valve with adapter, 12/case			
L040081	Replacement orange molded plastic carrying case (order separately)			
Every L554 BVM system comes with a patient bag and a patient valve				
*CE 0413				

**Bag Volume:** Adult: 1500 ml  
Child: 760 ml  
Infant: 240 ml

**Patient Valve Dead Space:** 8 ml (not including mask)

**Patient Connection:** 22 mm outside diameter  
15 mm inside diameter

**PEEP Connection:** 30 mm outside diameter

**Operating Temperature:** -30°F to 125°F (-34°C to 52°C)

**Storage Temperature:** -40°F to 160°F (-40°C to 71°C)

**Sterilization Temperature:** 270°F (132°C)

**Materials**

**Bag:** Silicone

**Patient Valve:** Polysulfone

**Intake Housing:** Lexan™

Optional disposable 30 mm PEEP valve with 19 mm valve adapter to complete the ventilation system.

- Adjustable from 0-20 cm H<sub>2</sub>O
- Fits easily on the exhalation valve
- Can be used on all makes of manual resuscitators

L099-002 Child  
L099-005 Adult  
L099-000 Infant

L040081 Replacement Carry Case
